FNP system

FNP number : 1104

Index FNP : S003

Last publication : 28/08/2024

State : PUBLISHED

Supplier : PPG

Total thickness : 140 µm

public comment EN : Aug. 01st, 2023 : First publication of the system. The bi-component product "CENTREPOX PZ NF" is renamed "CENTREPOX PZ EVO" following solvent reformulation of the base (hardeners are not reformulated but commercial trade name also changed to avoid confusion). The DI/TEGG note ref. D309522042727 [A] participate in qualification maintaining of all the FNP systems concerned. FNP1104 system succeeds to the FNP1041 system, on the same codifications with the products of the "EVO" segment. It should be noted that tests were also supported by EDF on the FNP1104 to argue the non-regression of the reformulated system.

intern comment : 28/08/2024 : intégration de l'avis sur FDS du diluant n°1 BIS (couleur bleue) 21/05/2024 : republication du système après paramétrage exhaustif des pièces constitutives du dossier 01/08/2023 : Mise en visibilité anticipée de la FT en attendant la vérification du DQ. Cela correspond à la première publication du système.

Utilities type : PARC NUCLEAIRE
